

Company Profile

<https://sanyotrading.jp/en/>

 **Sanyo Trading Co., Ltd.**

For the sake of all ships venturing into the open sea

Since our establishment shortly after World War II, we have been a maritime supply company, providing a wide range of products and services including statutory equipment to shipyards, ship chandlers, shipping companies, and other companies in the maritime industry. With multiple sales offices located near our customers, we have built a strong network to offer convenient customer service while fostering collaborations with suppliers both domestically and internationally.

Marine supplies sales service

Through our nationwide sales network, we sell essential statutory equipment and value-added products that contribute to safety and efficient operations.

Marine supplies and regulatory advisory services

When it comes to marine supplies, there are various rules and regulations, including those from international organizations such as the International Maritime Organization (IMO) and Japanese laws and regulations, aimed at ensuring safe navigation. These rules and regulations are constantly updated to align with the changing times. Our company has knowledgeable staff who are well-versed in this information, and we provide advisory and proposal services to our customers.

Import and export services

We import specialized products from around the world and provide delivery services worldwide according to customer requirements.

Domestic and international inspection agency services

Implementation and analysis services for related inspections in vessels handling petroleum-related products, gases, and other hazardous materials. Domestic and international life raft maintenance service.

Tailor-made equipment installation, management, and operation services

As a project planning and implementation coordinator, we collaborate with shipyards, shipowners, and manufacturers to provide high-quality and efficient services for equipment installation, management, and operation in the maritime industry.

Product development

We develop new products that contribute to the next generation of safe navigation.
